

Rebecca Hernandez Bio

My name is Rebecca Hernandez, and I am the Reactor Supervisor on behalf of the Nuclear Engineering and Science Center. I was born and raised in Navasota, TX, and have been a resident of Aggieland for the last 11 years! I am married with three sons and have a beautiful granddaughter! I was a single mom for ten years while attending Sam Houston State University and working full time at ErgoGenesis, LLC, ergonomic seating company.

I graduated college from SHSU with a Bachelor's degree in Business Administration in 2012. I went on to work for Texas A&M University in 2013 and during my time at TAMU became involved with grants administration for both public and research projects. I became a Certified Research Administrator (CRA) in 2019 via the Research Administrators Certification Council (RACC) while working at Texas A&M Sponsored Research Services.

I have over 24 years of business, management and accounting experience and five years of public and research grant administration experience. I have now combined all of my prior background knowledge and have dedicated it to serving in the Operations department as the Reactor Supervisor for the Nuclear Engineering and Science Center. I am so proud to be part of such an impressive and accomplished department who are all working towards great things for the future.
